

INTRODUCING THE

MVC5000

5 REASONS WHY YOU SHOULD UPGRADE

1 MAXIMUM VARIETY

Six trays vending **50 products** (20 cans, 10 bottles, 10 bars, and 10 chips) equates to **maximum variety** for your customers.

2 DUAL-ZONE TEMPERATURE

An adjustable inner temperature that drops to **3°C** means drinks stay **icy cold** throughout summer, while dual-zone temperature controls keeps chocolates and chips **lightly chilled**.

3 ENERGY EFFICIENT

The MVC5000's **energy-efficient** LED product lighting and LCD display **reduces electricity cost**, while looking fantastic.

4 DOUBLE-GLAZED GLASS

A large, double-glazed safety glass panel filled with Argon Gas **reduces fogging** and **improves insulation**, which reduces energy cost.

5 UPDATED SENSORS

The MVC5000's updated product sensor delivery system **ensures vend success** and **satisfied customers**, and its coin insertion slot forces single coin insertion and reduces coin jams.
